DETAILED ACTION

Request for Continued Examination

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 9/20/2002 has been entered. An action on the RCE follows:

Claim Rejections - 35 USC § 112

2. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claim 18 is rejected under 35 U.S.C. 112, second paragraph as being incomplete. This claim depends on claim 1 that has been cancelled. For purposes of the art rejection below, claim 18 have been examined as if it depends on claim 17.

3. Claim 17 recites the limitation "said frame memory unit" (last paragraph) in "a frame memory section." There is unmatched basis for this limitation in the claim.

4. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

5. Claim 17 is rejected under 35 U.S.C. 112, first paragraph, as containing subject matter which was not described in the specification in such a way as to enable one skilled in the art to which it pertains, or with which it is most nearly connected, to make

Art Unit: 2674

and/or use the invention. Specification only discloses "the size of the FIFO memory section 3 will be at least 32bits x 16 (see page 14, line 9, lines 24-25), and 32bits x 32 (see page 10, line 3). However, the application does not disclose expressly what size suitable of a first FIFO section for storing image data inputted, so as enable the examiner understanding the claimed invention.

6. Claims 17 and 18 would be allowable if rewritten or amended to overcome the rejection(s) under 35 U.S.C. 112, first and second paragraph, set forth in this Office action.

Conclusion

7. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Cross (US 6,108,015) teaches internal frame buffer (104a) goes through a FIFO (201), FIFO (202) and from external frame buffer (104b) (figure 2, col. 5, lines 35-38). Wu et al (US 6,329,997) teaches frame buffer 14 goes through FIFOs (16, 18, 20), 3-D drawing engine (12) to FIFOs (22, 24) (figure 1, col. 3, lines 10-20).
